TROPICAL CYCLONE WIND SIGNALS IN EFFECT

No Tropical Cyclone Wind Signal is currently in effect.

HAZARDS AFFECTING LAND AREAS

The remnant low is unlikely to directly affect the weather condition in the country within the forecast period.

HAZARDS AFFECTING COASTAL WATERS

The remnant low is unlikely to directly affect the sea conditions over the coastal waters of the country within the forecast period.

TRACK AND INTENSITY OUTLOOK

The circulation of the remnant low will likely be fully assimilated within the circulation of Tropical Storm “MARING” in the next 12 hours. For more information on the track and intensity outlook of the merger cyclone, refer to Tropical Cyclone Bulletin #10 for Tropical Storm “MARING” issued at 11:00 PM today.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless re-development occurs, this is the final bulletin for this weather disturbance.
